SINK™ A REVOLUTIONARY NEW PUTTING EXPERIENCE

MORE CONSISTENCY / MORE ACCURACY / MORE CONFIDENCE

ERGONOMIC CURVED HANDLE PROFILE

The pronounced pistol profile ensures the upper hand is positioned in a more relaxed and stress-reducing angle. With this alignment, the wrists are stabilized and movement is inhibited, allowing for a more fluid and consistent stroke guided by the upper arms and shoulders.

FUNCTIONAL SURFACE DESIGN & TEXTURE

Precisely designed patterns provide golfers with an effective hand position reference to promote improved putting consistency and confidence. The three distinctive textures offer an ideal surface that feels comfortable and secure in all moisture conditions.

SUPER LIGHTWEIGHT RUBBER COMPOUND

For decades, golfers have preferred the responsive feel, all-weather playability and durability of rubber grips. The new lightweight rubber featured in SINK Putter Grips delivers the proven performance benefits of traditional rubber while maintaining the optimal putter grip weight.

23% lighter than traditional rubber
